

TEAM DECISIVO

Design Proposal for
Nevada Museum of Art

Altered Landscapes

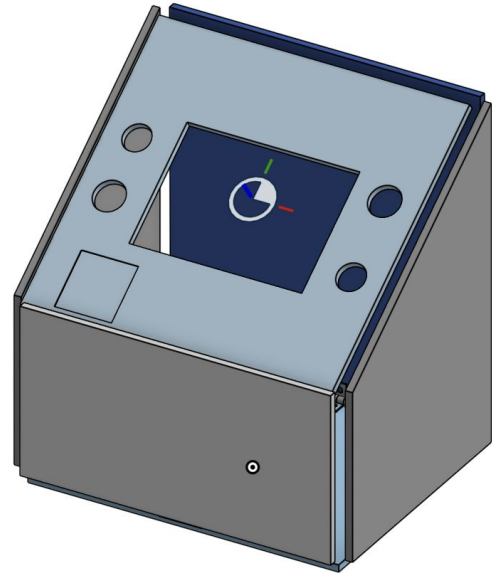

Design Statement

- Create higher duration of engagement
- Highlight Altered Landscapes
- Invoke critical thinking, with sensory interaction
- Maintain museum atmosphere

Our Design:

- Display varied landscape art
- Require physical actuation
- Demonstrate human effects on land

Prototype:

Arduino and Wheel :

- Four pictures
- Buttons

Arduino and Wheel Mechanism :

Instructions:

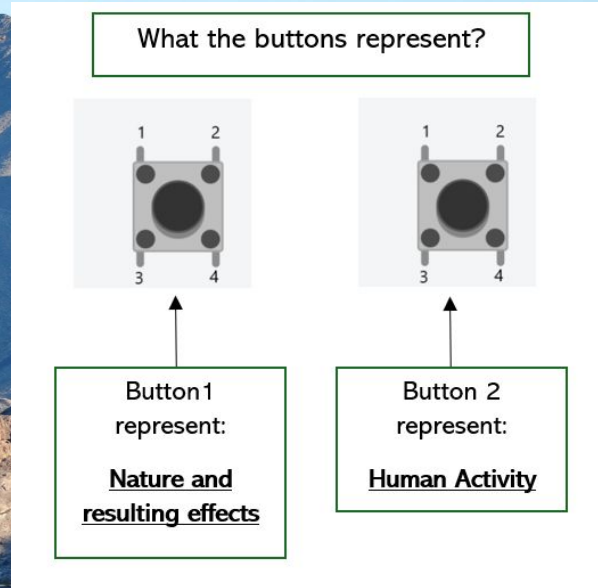

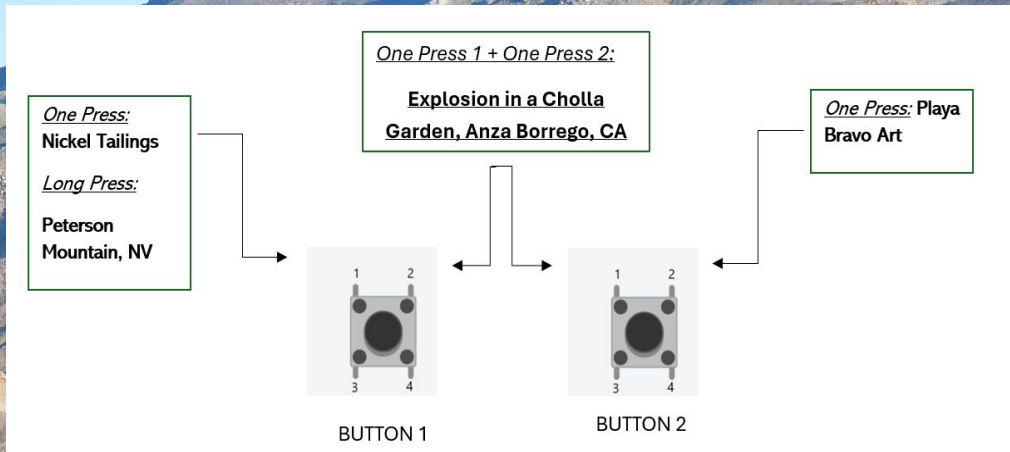

Photo 1: Petersen Mountain near Border Town, NV

Photo 2: Nickel Tailings #36, Sudbury, Ontario

Photo 3: Playa at Bravo 20 Bombing Range near Fallon, NV, 1990

Photo 4: Explosion in a Cholla Garden, Anza Borrego, CA

Design Specifications

Scaling:

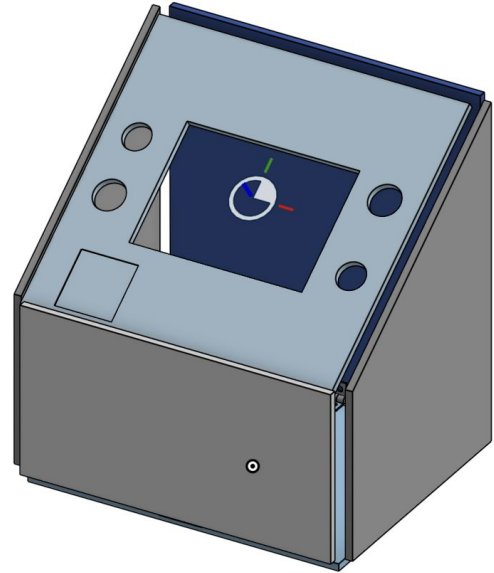

- Height, and size
- Automation
- Materials(Plywood)
- Mountain design exterior
- Hinges

Safety:

- Plexiglass
- Foam models

Intentions

- Devastated Landscape
-

A photograph of a massive landslide in a mountain valley. The landscape is characterized by steep, eroded slopes of light-colored soil and rock, showing distinct horizontal layers. A winding dirt road is visible at the bottom of the valley. In the background, dark green forested hills rise above the landslide area. A large, semi-transparent green rectangular box is centered over the image, containing the text "Thank you!" in a stylized, orange, handwritten font.

Thank you!
