

Our Goal

Team Decisivo

2.00C is built around designing for a client, who in our case was Colin Robertson at the Nevada Museum of Art. In his words, the Nevada Museum of Art is “a museum of ideas. While building upon our founding collections, we foster diverse and inspirational encounters with art and cultures and encourage interdisciplinary investigation. Foregrounding the role of art and its relationship to the environment, the Nevada Museum of Art is an educational resource for everyone.”

Following this discussion, our goal became to draw attention to and increase visitor engagement with pieces in the Altered Landscapes collection without disturbing the minimalistic and calm environment of the existing exhibits.
